

SAP S/4HANA Migration

SAP S/4HANA Migration

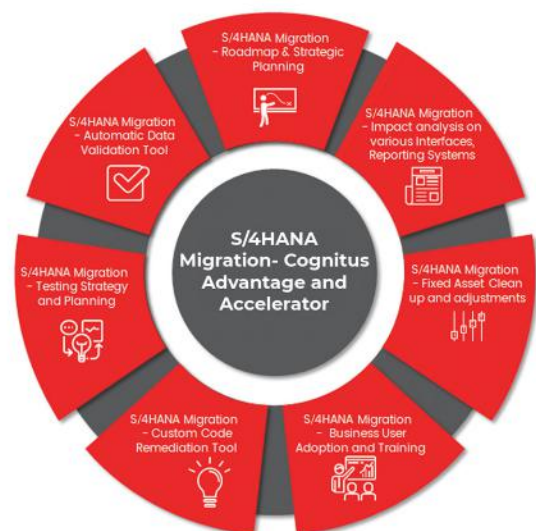

Cognitus S/4HANA experts review the existing enterprise system architecture including various 3rd party systems, interfaces and prepare an organizational IT roadmap to best utilize S/4HANA integration capabilities in various business processes across the enterprise.

In case of Conversion from ECC to S/4HANA, we help clients with comprehensive planning strategy including Sandbox conversion, Parallel System landscape planning, dual development to support existing ECC system during transition period, Mock conversion, UAT and fulfilling SOX Audit requirements.

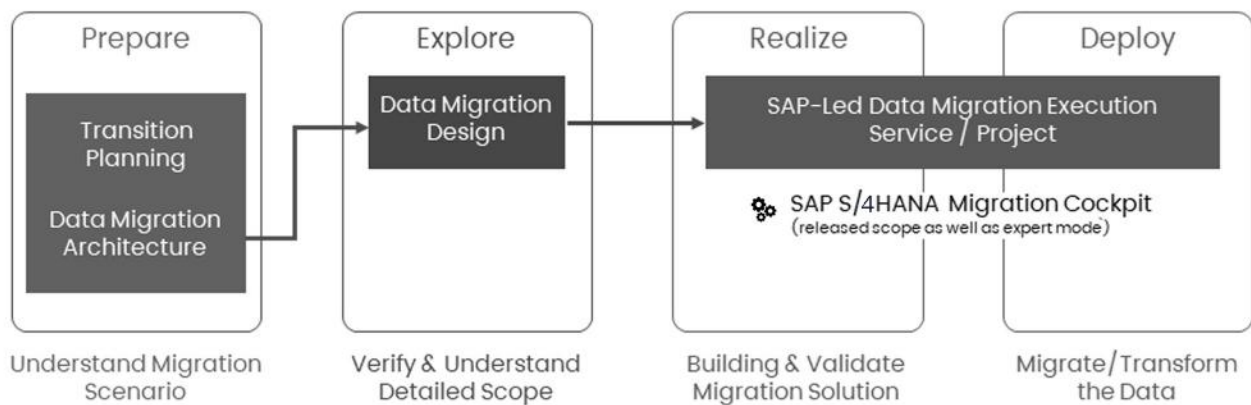

S/4HANA Migration – Cognitus Advantage and Accelerator

- Cognitus S/4HANA experts review the existing enterprise system architecture including various 3rd party systems, interfaces and prepare an organizational IT roadmap to best utilize S/4HANA integration capabilities in various business processes across the enterprise.
- BI Enterprise reporting is one of the challenging tracks in an S/4HANA conversion project as organizations use various systems; HANA Sidecar, SAP BW or a third party EDW.

- Fixed Asset module generally causes most conversion issues due to historic shortcuts taken by business users in Asset Life cycle, in addition to activation of New Asset Accounting.
- A successful S/4HANA greenfield or conversion implementation heavily depends on user adoption and acceptance of the new business process.
- One of the tedious tasks in S/4HANA conversion is custom code remediation in heavily customized SAP environments.

More than 80% of data migration projects run over time and/or over budget. Cost overruns average 30%. Time overruns average 41%.

80% of organizations... will underestimate the costs related to the data acquisition tasks by an average of 50 percent.

50% to 70% of ERP implementations are reported as "challenged" in part to data integrity and/or data accuracy problems.
