

SAP Leonardo and Blockchain

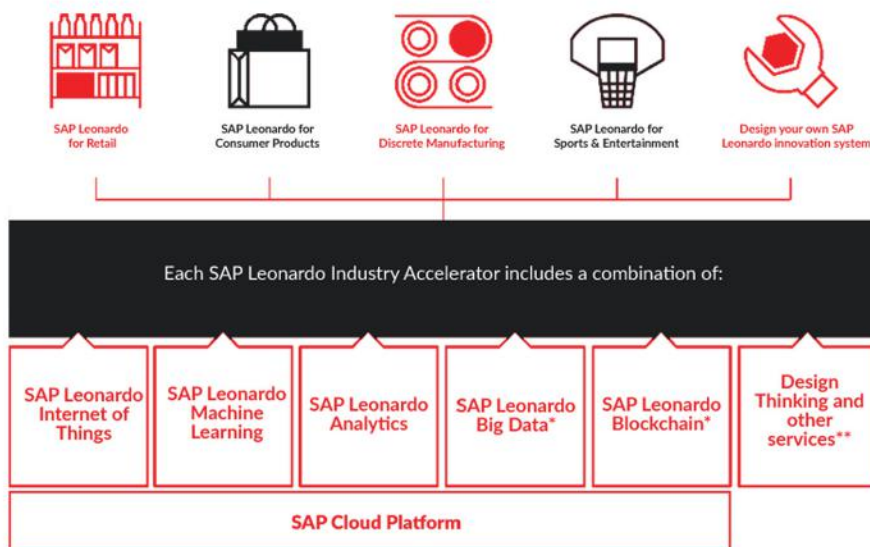

SAP Leonardo and Blockchain

SAP's move into BaaS technology helps it embrace blockchain as a core of secure transaction-based business. Designed and built off of the Hyperledger open source blockchain platform, SAP's Cloud portfolio is a strong fit for the peer-to-peer driven technology where the decentralization of data creates high Byzantine fault tolerance (BFT).

As supply chains move into ever-increasingly complex states of existence, featuring multiple suppliers, delivery and levels of service, blockchain tech represents an eminent future that both solves the lack of visibility that the chain has endured as well as ensures greater security that is the calling card of blockchain's open distributed ledger.

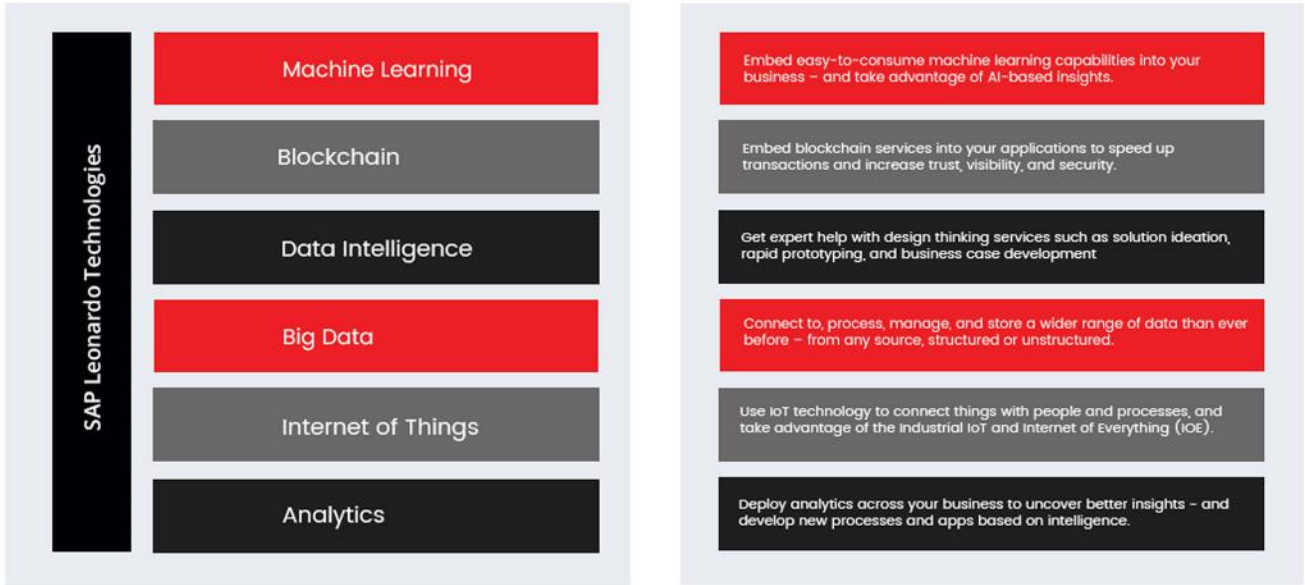

SAP Leonardo Architecture

SAP Leonardo and Blockchain

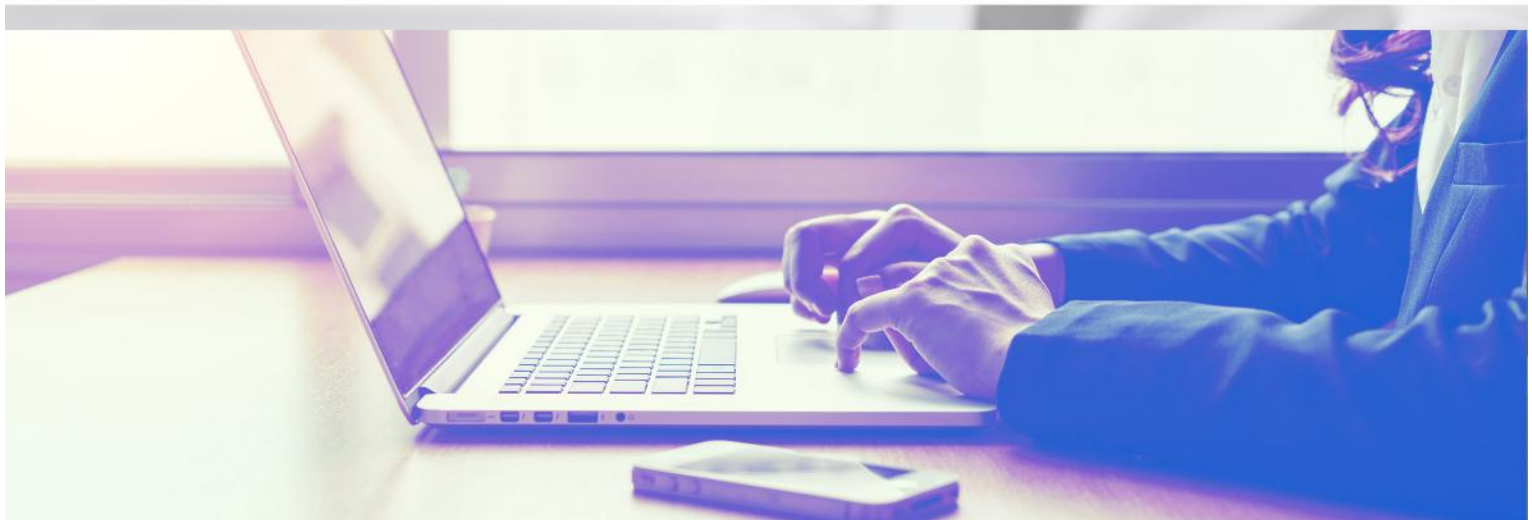

SAP Leonardo Digital Innovation System

Choose SAP Leonardo and Blockchain for the better

What does all this mean? **Better Outcomes for your business!**

SAP Leonardo IoT solution that makes it easy to connect and monitor sensor-equipped products. SAP has introduced “Leonardo,” a new Blockchain as a Service (BaaS) offering which is “ready-to-use blockchain technology” that resides in the SAP Cloud and integrates as a single ecosystem with machine learning and the internet of things (IoT).

Global Capability to Deliver

We support in global transformation programs.

Cognitus has consultants worldwide and a mix of onshore and offshore centers, we have the capability to deliver projects globally.

Solution know-how

Global Presence, Expert Competence and Ability to Execute.
