

SAP TRANSPORTATION MANAGEMENT

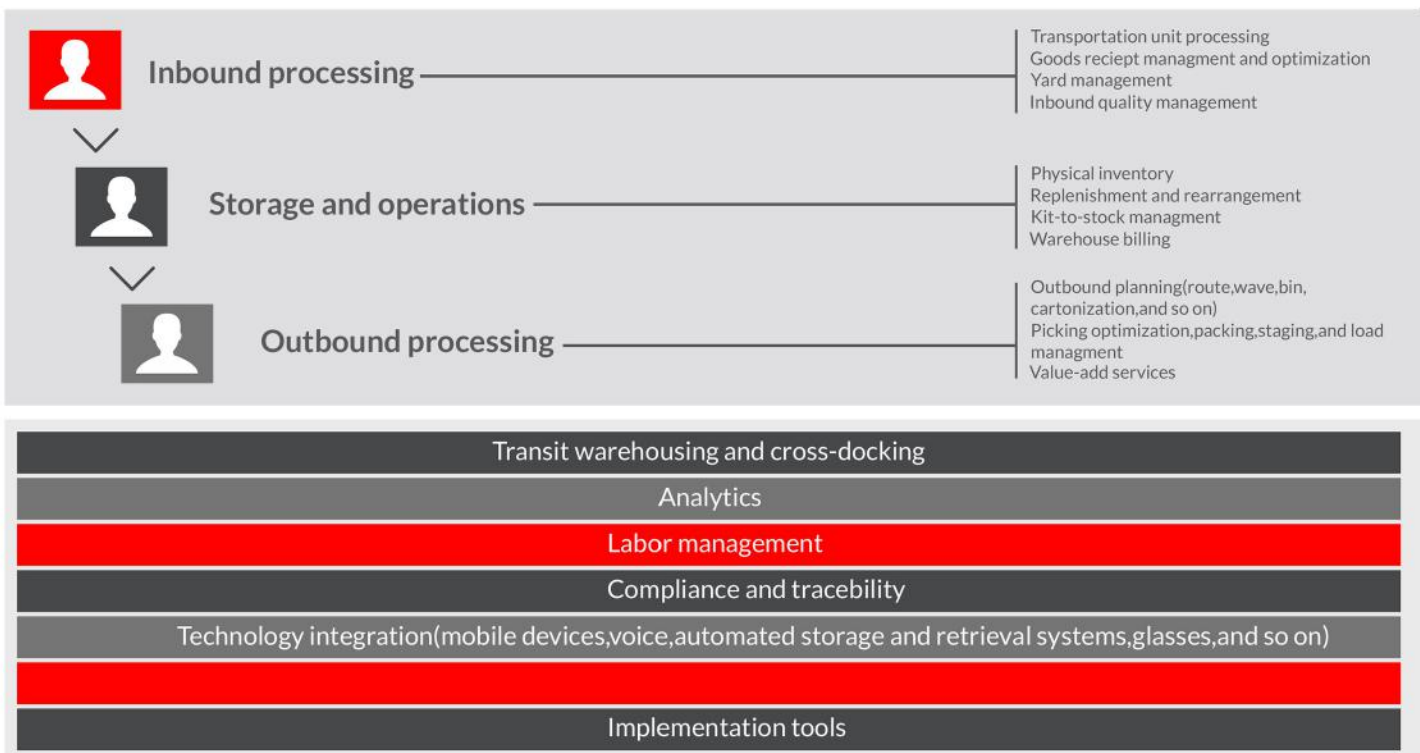

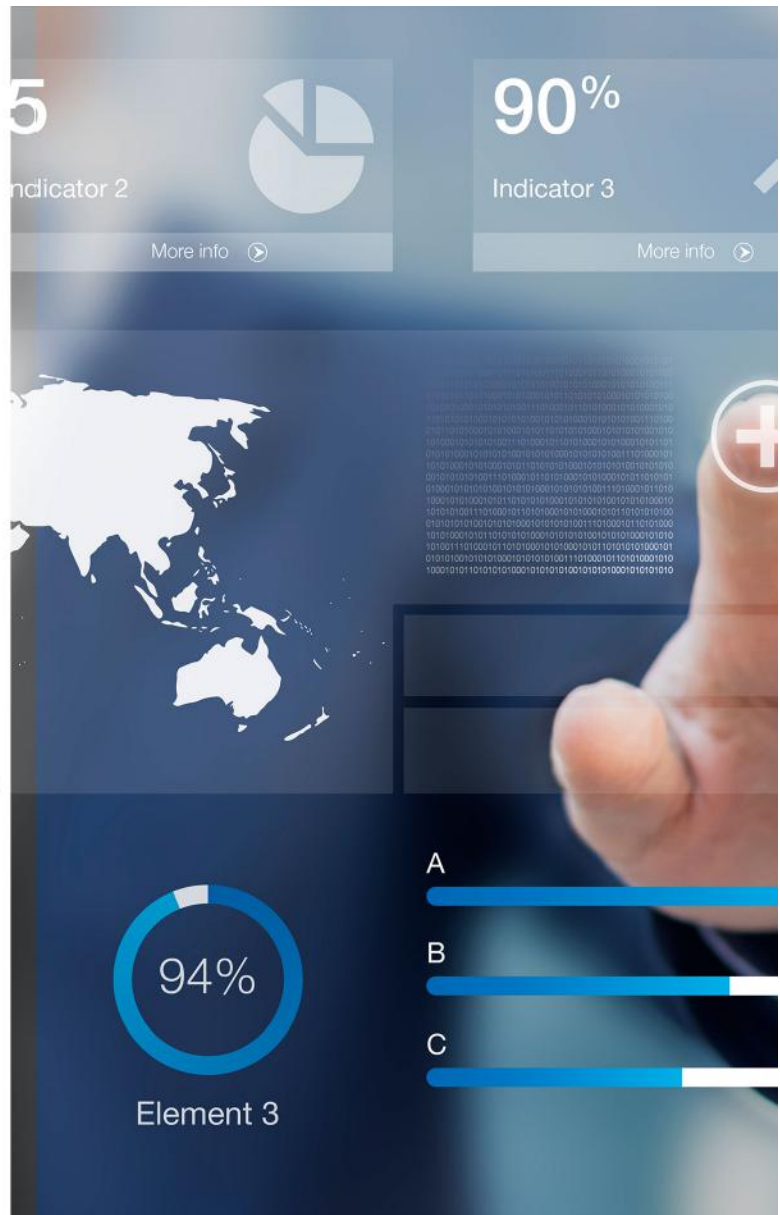

SAP TM FUNCTIONS

Optimizing Transportation Processes

The complexity of global supply chains is growing while technology is advancing at a rapid pace. Transportation costs are increasing, legal requirements are constantly changing and at the same time customers expect the highest levels of service. To tackle these tangible challenges, the need for an efficient, highly connected transportation platform is very real.

Cognitus believe that only by combining a deep business competence, a state of the art software solution and an outstanding team of consultants can deliver a successful transformation project.

SAP S/4HANA® EMBEDDED EWM

Manage high-volume warehouse operations and integrate complex supply chain logistics with warehouse and distribution processes – delivering the ultimate in visibility and control. Optimize inventory tracking, cross-docking, distribution operations, multichannel fulfilment, and more – all in real time.
