

Solution Summary: Gallop – IIA

Gallop Intelligent Invoice Automation

WHAT DOES GALLOP INTELLIGENT INVOICE AUTOMATION DO?

Gallop Intelligent Invoice Automation is the next-generation cloud-based tool allowing you to do away with the manual burden of invoices. Built on a strong AI platform powered by Microsoft Azure and the all-powerful SAP S/4HANA, it helps businesses accelerate their invoice approvals, minimize errors, cut down processing costs, and meet their legal and auditing requirements.

KEY FEATURES OF GALLOP-IIA

01

No repetitive invoice-model training needed

02

Automated Mailbox Extraction - Touchless, Fully automated End-to-End Process

03

Automatic invoice extraction from email to DMS (Microsoft SharePoint, Google Drive etc.)

04

Interactive dashboard built on SAP Analytics Cloud

05

Average Processing time for an invoice is 45 to 50 seconds.

BUSINESS PROBLEMS

1. Missed or Mislplaced Invoices
2. Data that is Mismatched or Missing
3. Unknown Invoice Status
4. Invoice Routing Errors

INTEGRATION WITH

Gallop IIA leverages SAP Business Technology Platform (BTP) to feed data into SAP S/4HANA. The invoice attachments are stored in a Document Management System (DMS) such as Microsoft SharePoint, Google Drive. The links to the invoices are stored in SAP Fiori Apps.
